

# REFLECTIONS

Transitions are always magnificent to observe, whether over a span of milliseconds, minutes, hours or a whole generation, they always inspire awe. Here is how a great institution traveled through time and made it successfully across the generational gap.

### NOTICE BOARD TO DISPLAY UG RESEARCH

**“The only good is knowledge and the only evil is ignorance”- Socrates**

The rapid proliferation of knowledge in today's society owes its success to the diffusion of research to the masses. Bombay Technologist's latest initiative brings forth a fantastic opportunity for budding undergraduate researchers of the institute to showcase their hard work and passion. A notice board is being set up to display your research to a multitude of people and set you in the limelight. All UG students who have published a Scientific Research paper or Review paper in any renowned Journal after January 2017 can mail their names along with their papers (soft copy) which clearly states the date of publishing, the name of the journal and the DOI (if available) to [editorial@bombaytechnologist.org](mailto:editorial@bombaytechnologist.org).

The first page of the paper consisting of the abstract and names of the publishers of selected Research and Review Papers shall be displayed on the ICT Notice Board.

The last date of submission is February 20, 2018. You can also send us your articles as and when they are published.
