

REMINISCENCE

Over the course of 60 years, prominent names from the chemical industry have facilitated the success of Bombay Technologist. Here is to remembering our sponsors through a monochrome spectacle.

Year: 1980-1990

**We are not one among the many!
we are 'Winners' since 1936,
in the production of quality
Process Chemicals.**

A lot of names have arrived on the scene since we got on with the job of producing quality Process Chemicals in 1936. Some of them have turned smart performances, but to our clients we are unmatched. You see, it is not just a matter of sentiments but hard business savvy.

Our clients simply refuse to accept the second best. It is natural for them to feel secure in all respects when they come to us. Ahura being pioneers in the manufacture of Process Chemicals have definitely something extra to offer. Remember Ahura are not one among the many they are "Winners" then and now.

Progress is the constant widening of the imagination

Imagination, the unique human faculty to think, visualise and plan, is the root of all progress—the take off point for art, science and technology.

At L&T, we visualise the needs of major industries like petroleum, petrochemicals, fertiliser, pharmaceuticals, dyestuffs, heavy chemicals, explosives... For over 40 years we have developed the capability to design, manufacture and install unit operation equipment and process plants for every specified requirement.

This capability is backed by facilities like process design service, a well equipped heavy and general workshop at Powai; modern scheduling techniques and an independent inspection department. The R&D unit, complete with pilot plants, prototype units, data bank... has helped the Company to acquire expertise in the manufacture of sulphuric acid, oleum, superphosphate, synthetic detergent and other allied plants.

Our technological know-how is enriched by the experience of collaborators like Swenson, U.S.A., for evaporators and crystallisers; Niro Atomizer, Denmark, for suspended particle drying plants; Struthers Wells, U.S.A., for ultra high pressure vessels; SCHOTT, West Germany, for acid concentration plants; Josef Meissner, West Germany, for nitration plants, industrial and military explosives and PENTA plants.

fresh and glowing with

HAMAM

Now, a more fragrant Hamam for that fresh and glowing feeling your family will love.

Hamam...for a fresh and glowing you.

HAMAM
the longer lasting toilet soap

Tomco products are better buys. They cost less... perform better

The Tata Oil Mills Company Limited
CMTH-15-124R

Yes. It's true that Colour-Chem offers you a wide range of pigments and dyes. Which covers a complete spectrum of shades—from yellow to black—for every product line. And which covers a variety of properties and price levels as well. To meet all your requirements.

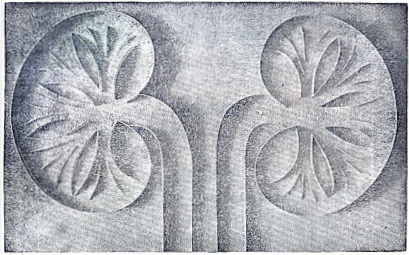

And, what's more, this range keeps growing wider. Yet, this is only 50% of our story... The other 50% is the fact that our products are the result of world-class technology. And every batch is rigorously tested before it comes to you. To help you get good results. Batch after batch.

What's more, when dealing with us you get the benefit of our reliable technical service. Whether it's a question of assisting you with formulations and colour matching. Or helping you solve some tricky technical problem that threatens to disrupt your production.

These are the two halves of our story. And they add up to one thing: if you're in the market for pigments and dyes, your best bet is Colour-Chem.

many things to many people...

- to nationalists of pre-Independence vintage— a dynamic expression of 'swadeshi' enterprise.
- to insiders of the Indian Pharmaceutical Industry— the pioneer in innovative technology.
- to the progress-conscious medical fraternity— the prompt provider of the latest in international drugs.
- to chemists big and small— a concern whose ethical commitment is reflected in every brand it markets.
- to patients in uncouped millions— a company that has contributed with sincerity to improving the quality of life—in sickness and in health.

an ongoing saga of dynamic diversification

from formulations to medicinal aerosols
from research to basic manufacture
from steroid processing to agronomy
from export to technology transfer...
